FULLY FUNCTIONAL TECHNOLOGY, INC.

CAPABILITY STATEMENT

Enterprise Technology Integration, Cybersecurity, Cloud Infrastructure & Mission-Critical Systems

One trusted partner for secure enterprise IT, cybersecurity, cloud modernization, network modernization, and strategic technology leadership.

SERVING: Federal Agencies State & Local Gov't Tribal Governments Nonprofits Healthcare Commercial Enterprises Professional Services Faith-Based Organizations

COMPANY OVERVIEW

Fully Functional Technology, Inc. (FFT) is an enterprise technology integrator delivering secure, mission-critical infrastructure through cybersecurity, cloud architecture, and network engineering. Dual-licensed as a general building contractor and low-voltage systems contractor, FFT designs and implements complete technology environments—from physical infrastructure to cloud and identity architecture—under a single roof, delivering secure, resilient technology environments through engineering excellence, responsive execution, and long-term strategic partnership.

CORE COMPETENCIES

Cybersecurity

Design, deployment, and management of enterprise-grade endpoint, network, and compliance security programs.

Cloud & Modern Workplace

Migration, administration, and identity management across Microsoft 365, Azure, and Entra ID environments.

Audiovisual & Collaboration

Design and integration of enterprise AV, conferencing, and secure guest networking systems.

Managed IT Services

Proactive monitoring, help desk support, infrastructure management, and endpoint lifecycle and patch management.

Technology Consulting

Enterprise IT strategy, architecture, and Virtual CIO advisory guiding technology modernization.

Network Infrastructure

Enterprise networking, cloud-connected infrastructure, and secure wireless design supporting technology modernization, with licensed structured cabling as a supporting capability.

DIFFERENTIATORS

- ✓ Single-source delivery of physical and digital technology infrastructure.
- ✓ Executive-level engineering leadership throughout every engagement.
- ✓ Security-first architecture aligned with Zero Trust principles.
- ✓ Proven experience supporting regulated, federally funded, and mission-driven organizations.
- ✓ California contractor licenses enable FFT to deliver complete technology modernization projects through a single trusted partner.

PAST PERFORMANCE

Famico Studios

Secure enterprise networking and structured cabling supporting a high-performance media production environment.

Tribal Law and Policy Institute

Microsoft 365 modernization, cybersecurity hardening, and IT consulting for a federally funded tribal nonprofit.

Revelation Church

Cisco Meraki wireless, secure guest networking, and AV integration for a multi-site organization.

Commercial & Professional Services Clients

Ongoing enterprise IT, cybersecurity, and cloud modernization across a diversified client portfolio.
